PERSONAL PROFILE:

A keen IT enthusiast with a desire and passion for software development. Previous experience in Chemical Engineering with strong analytical and problem-solving skills. Proficient in frontend development and JavaScript, with hands-on experience across multiple projects. Possessing a solid foundation in technical troubleshooting and exemplary communication skills. Currently seeking an entry-level IT position to leverage skills and embark on a rewarding career journey.

KEY SKILLS:

- Web: **HTML, CSS, SCSS, JavaScript, TypeScript, Angular, Python, SQL, Webpack, Git**
- Business administration
- CAD software tools: CAD Drafting (utilise AutoCAD, Visio, Compass)
- Technical proficiency: stay updated on the latest
- Multilingual: Ukrainian, Russian, Slovak, Advance: English
- Food Chemistry
- Disciplined with high attention to detail
- Analytical and problem solving
- Research and analysis
- Full UK Driver's License
- **Financial Tools & Software:** Sage (basic knowledge), **MS Excel** (pivot tables, formulas), Word, Outlook

PROJECTS:

Barbershop Website (Commercial Project)

- Designed and developed a custom commercial barbershop website as a paid project for a client.
- Built using TypeScript, SCSS, and Webpack, ensuring scalability and maintainability through Object-Oriented Programming (OOP) principles.
- Delivered a responsive and user-friendly design featuring interactive galleries and dynamic components tailored to the client's business needs.

EMPLOYMENT HISTORY:

Employer: **Powerful Force LTD**

September 2024 - October 2024

Role: **Administrator**

Main Duties:

- **Material Procurement:** Responsible for ordering materials as instructed by mechanics, maintaining accurate records of purchases, and ensuring proper allocation, invoicing, or stock registration.
- **Record-Keeping & Reporting:** Managed procurement-related documentation and generated detailed reports for management, providing insights on inventory status and expenditures. Ensured compliance with company standards to support audit processes and promote transparency.

Career Break

2022 - 2024

Activities:

- During this period, I studied front-end development through a project-based course that prioritized hands-on, real-world experience over theory, all under the guidance of a **mentor** who offered valuable insights and directed my professional growth.
- I have expertise in the **Git** version control system and the **GitLab** and **GitHub** platforms for collaborative coding, change tracking, and task management.
- Then, I studied **HTML/CSS, SCSS** specifically focusing on the fundamentals of layout design, creating a layout for a web application, **Flex** and **Grid** layouts, and implementing complex user interfaces.
- The next step was JavaScript and **TypeScript**. I learned about interacting with the **DOM**, **object-oriented JavaScript**, form extension and validation, updating web pages using **AJAX**, and **data storage** using Local and Session Storage and cookies.

- Additionally, I mastered the **Angular** framework for developing SPA applications. The main tasks included creating components, modules, models, and services, types of data binding, built-in directives, events and **forms, pipes**, components and their lifecycle, services and their providers, **routing**, modules and lazy loading, **asynchronous HTTP requests**, using the **RxJS** library, and storing data with **Firestore**.

Self-Employer (Freelancer)

2019 - 2022

Role: Draughtsperson

Main Duties:

- During my time as a freelancer, I developed and honed various skills, focusing primarily on AutoCAD and space planning;
- I created, updated, and managed documentation in line with client engineering requirements and as-built expectations, ensuring adherence to company templates for drawing creation.

Employer: Ukrainian Mineral Water Corporation

2018 - 2019

Role: Chemical Engineer

Main Duties:

- Analysis of raw materials, intermediates, and production batches throughout the manufacturing process in a timely manner;
- Maintaining organisation of data records, reference standards, procedures within the Quality department;
- Recognise trends within data records and producing reports regarding these trends;
- Ensured that all safety protocols were strictly followed at all times.

Employer: Private Enterprise

2014 - 2015

Role: Accounting

I worked for a private enterprise as an economist and part-time logistician. In this job, I had experience in teamwork, developing good working relationships with employees and making use of my clear communicative.

Main Duties:

- Management of the balance sheet, including reviewing the general ledger and ensuring the integrity of all balance sheets;
- Accounting for receivables and payables;
- Generated financial reports detailing trends and accounting activities;
- Drafting company annual reports;
- Forecasting the end-of-year financial position;
- Support for staff payroll function.

EDUCATION HISTORY:

Just IT Training Ltd, London

March 2024 - June 2024

Digital Skills Bootcamp: Software Development, Pass

A twelve-week intensive bootcamp covering the fundamentals of Web and Software development

Foxmined, Ukraine

2022 -2024

Training center: Front-end development, Pass

Real practice with tasks similar to real work tasks under the guidance of a mentor

Odesa National Academy of Food Technologies, Ukraine

2013 - 2014

Master's qualification in engineering

Kyiv National University of Food Technologies, Ukraine

2007 - 2013

Bachelor's degree in food technology engineering

Activities & Interests:

I enjoy playing the piano, which is a passion of mine. I love hiking in the mountains and snowboarding. Additionally, I enjoy playing checkers. I regularly follow Awards, which inspires me with new ideas and interesting design solutions, helping me train my eye for web aesthetics.
